

# Portal Administration

TRIBAL

The Interactive Workspaces should be accessed by a single sign-on and deliver all-encompassing, smart, useful and relevant information tailored to user's needs through an interactive, simple, maintainable system with a common look and feel. It will provide exactly what the user wants in a format that meets user's requirements.

## Scope

The Portal Administration Project is made of three strands:

1. Deliver a Portal solution that should be accessed by a single sign-on and deliver all-encompassing, smart, useful and relevant information tailored to user's needs through an interactive, simple, maintainable system with a common look and feel.
2. Analyse the current governance of the student Portal solution and suggest a method of governance for the new Portal solution
3. Analyse the current governance or Role Groups and suggest a method of governance
